# Oil Refreshing Soap

## Natural, caring wood soap

Oil Refreshing Soap is an oil and soap mixture for cleaning and maintaining oil- and wax-treated wooden floors. The product cleans the surface while also providing nourishing oil that penetrates the wood and leaves a protective, matte finish.

- Clean and maintain in one operation
- For oil- and wax-treated wooden floors
- Adds nourishing oil to the surface
- Leaves a protective, matte finish
- Helps to maintain the natural appearance of the wood
- Enhances the natural colour of the wood

## Application area

For cleaning, care, and maintenance of oiled and wax-treated wooden floors. The Natural variant is used for natural and color-oiled wooden floors, and the White variant is for white-oiled wooden floors.

## Work description

**Preparation**
For particularly difficult stains, treatment with WOCA Wood Stain Remover or WOCA Intensive Wood Cleaner is recommended before cleaning with Oil Refreshing Soap.

**Always Remember**
Always remember to test on a less visible spot to check the compatibility of the surface with the product.

**Treatment**
Shake the bucket carefully before use. Make sure the pigments are evenly distributed. Mix Oil Refreshing Soap with lukewarm water: – For traditionally oiled floors: 1:20 (250 ml soap in 5 L water). – For UV-oiled and oil-wax treated floors: 1:40 (125 ml soap in 5 L water). The mixing ratio may vary depending on wear. Wash the surface lengthwise with the soapy water. It is recommended to clean an area of about 10 m² at a time. Let the wood dry for about 2 hours before use. The dry surface can be polished with a white pad if the surface is to be slightly glossy. Achieve the best result with two buckets: one with soapy water and the other with clean water to rinse the dirty mop in. Wash the floor lengthwise with a lightly wrung mop or cloth. Then immediately dip the mop or cloth into the mixture, wring it out hard, and wash again lengthwise. By doing this, the floor is only exposed to moisture for a short period.

**Please note**
Use a mop/cloth that contains cotton - do not use 100% microfiber. For best results, use 2 buckets, one for wringing out the cloth and the other for clean soapy water. For refreshing hard wax oiled floors, use a mixing ratio of 1:10 (500 ml soap in 5 L water).

## Drying time

**Drying time :** 2-3 hours at 20°C

## Technical data

**Declaration:** <5%: anionic surfactants. Non-ionic surfactants. Preservation agent (BENZISOTHIAZOLINONE)

**Density:** 0.95-1.00 g/ml.

**pH-value:** pH 6-7

**Shelf life:** 3 years

**Application Temperature:** +15-25°C and approx. 50% air humidity.

**Coverage:** 150-200 m²/L

**Colours:** Natural, White

**Cleaning of tools:** Use warm water

**Storage:** +10-25°C. Keep out of reach of children. Do not expose to heat (e.g. sunlight). Store frost-free during winter and cool during summer.

**Packaging sizes:** 1 L - 2.5 L

**Dilution:** Water

**Odour:** Faint

**Solid content:** 20-30%

**Mixing ratio:** For traditionally oiled floors: 1:20 (250 ml soap into 5 L of water). For UV-oiled and oil-waxed floors: 1:40 (125 ml soap into 5 L of water).
