

Recycling Equipment

EPS Granulator

EPS Granulator

Reduce volume by up to two-thirds

The granulator reduces the volume of bulky EPS material by up to two-thirds by shredding the material into fine granulates.

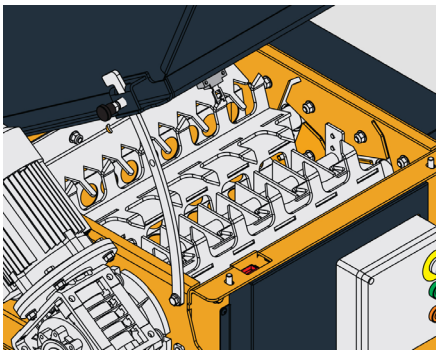

Ideal for retailers and businesses

The granulator is user-friendly, reliable, and designed for daily use in retail, warehouse, and industrial environments for those who want to optimize their waste management and reduce the cost of EPS disposal.

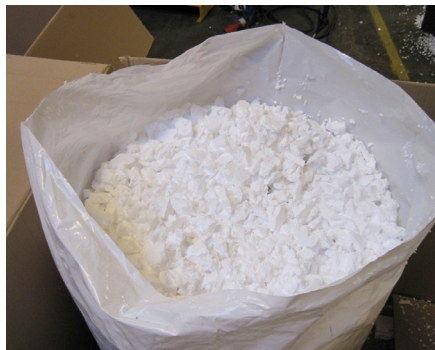

Highlights

- Reduce volume by up to two-thirds
- In-chamber plastic bag to collect granules
- Bag is easy to change when full
- Takes up little space
- Low overall height
- Painted surface

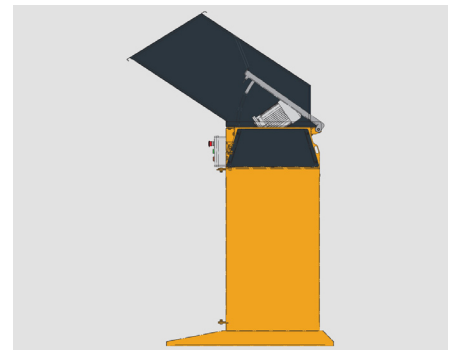

Details and benefits

Polystyrene sheets or boxes are efficiently granulated by the two-shaft rotors.

When the plastic bag is full with granulated material, you can easily exchange it with a new bag.

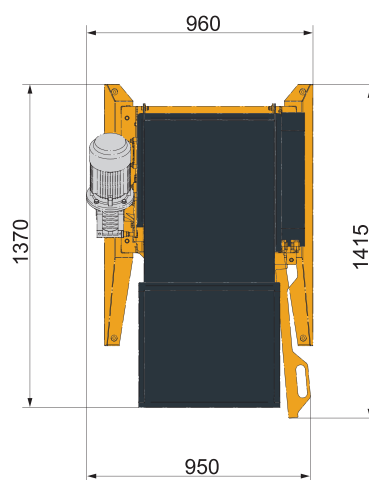

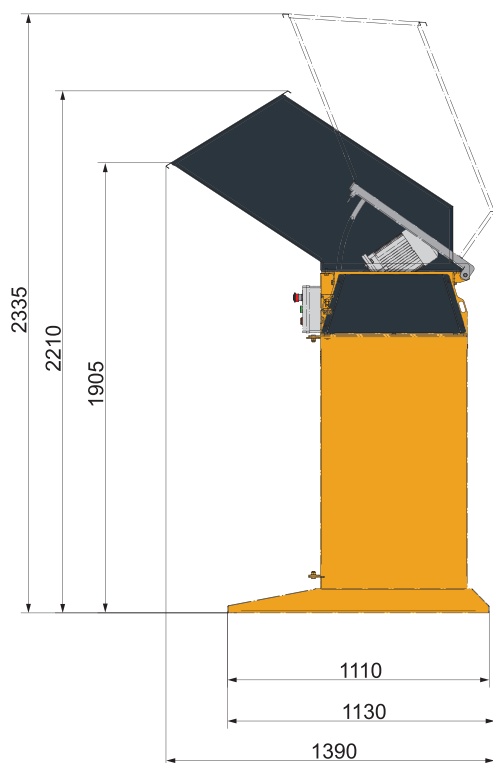

A low overall height makes the granulator fit in tight spaces with low ceilings.

EPS Granulator

Technical specifications

Power supply	3x400V 50Hz 16A
Motor (HP)	1.5
Dimensions WxDxH (inch)	960 x 1390 x 2210
Weight (lbs)	235
Compaction ratio:	
Compaction ratio	Up to 3:1
Suitable bag size (Liters)	240
Feed opening (mm)	547 x 500

Waste volume

Small / Medium

Feed opening

547 x 500 inch

Waste types

EPS.
