Keep your living space warm and your battery charged.

Entiffic AIR is a true selfpowered reliable heater, designed for caravans, campers, boats and cabins. It produces the electrical power needed to run the heater and the surplus electrical power is used to keep the connected battery charged.

Entiffic AIR is a unique cabinheater, designed to give you the best heating comfort. It is unique in the sense that unlike any other heater entiffic AIR charges the connected battery during operation. After only a few minutes of operation the unit is selfpowered and after approx. 20 min of operation, the battery has been fully compensated for the energy needed to start up the heater. Additional running time will charge the battery. And should the battery be fully charged Entiffic AIR automatically stops charging.

The external thermostat helps you to easy set an appropriate temperature. Entiffic AIR can also be controlled remotely via GSM-modem and via an app for smartphones (optional).

- Build for comfort
- Low noise
- Compact design
- Remote control
- Easy installation
- For 12V DC and 24V DC systems

**Dimensions:**

W 153 mm x L 390 mm x H 182 mm

Weight:

4.6 kg

Campers/caravans:

Entiffic AIR is the ideal choice for your camper. The heater will keep your living space warm without any concerns about empty batteries. This means that entiffic AIR will support that freedom feeling you have – going anywhere with your camper on your own time. As long as you have fuel in your tank Entiffic AIR will keep you warm.

Boats:

The comfort of the Entiffic AIR is universal. The low noise from Entiffic AIR is hardly noticeable, enabling you to enjoy the full comfort of your vessel, even in areas where conventional generators/gensets or engine idling is not allowed. Also Entiffic AIR is perfect to reduce damp and moisture during periods in harbour. The unique feature of the unit keeping the connected battery charged also enables you maintain the battery of the boat during a long winterstorage.

Cabins:

Entiffic AIR is the reliable heatsource for your cabin and with the comfort of the GSM-modem (optional) you can have your preferred leisure space heated and ready to use when you arrive. The small size and low noise during operation makes entiffic AIR a good companion to keep you warm when you spend time on your own.

Specifications:
