

This is not just a clean floor.

This is floor lifecycle optimization
– simple and professional.

Water alone isn't enough.

Modern surfaces demand more than basic cleaning – they require the right balance of cleaning and care. With the optimal system, you achieve efficient cleaning and long-lasting protection in one simple routine.

WOCA offers a complete professional system for lacquered wood, laminate and vinyl:

+ MASTER CLEANER ensures efficient daily cleaning without residue build-up.

+ MASTER CARE protects the surface and extends the floor's lifetime.

The result?

Less maintenance issues, lower lifecycle costs, and consistently premium-looking floors
– even in high humidity and high-traffic environments like hotels, condos, and retail spaces.

Surfaces that not only look clean – but perform like new.
